# **WORKING GROUP ON ETHICS**

**THE WORKING GROUP ON ETHICS AIMS TO ADDRESS AND PROMOTE ETHICAL  
CONSIDERATIONS WITHIN THE FIELD OF PROFESSIONAL EDUCATION, PRACTICE  
AND RESEARCH ACTIVITIES.**

# AIMS & GOALS

**01**

## **Ethics for Professional Conduct:**

The primary objective of the working group is to develop and promote ethical guidelines and principles for professional conduct within the prenatal sciences. These guidelines will serve as a framework for professionals, ensuring that their actions and decisions uphold high ethical standards and align with the best interests of clients, and the broader community.

**02**

## **Ethics in Transcultural/ Transdisciplinary Collaboration:**

The working group recognizes the importance of transcultural or transdisciplinary collaboration within the prenatal sciences. To facilitate such collaboration ethically, the group aims to explore and address the ethical challenges that arise when working in diverse cultural or disciplinary contexts. By promoting respect, understanding, and effective communication, the group seeks to foster ethical practices and harmonious collaboration across boundaries.

**03**

## **Ethical Approval for Research Projects:**

The working group emphasizes the significance of ethical considerations in research projects within the prenatal sciences. It aims to establish guidelines and procedures for obtaining ethical approval for research projects, ensuring that research involving human subjects or sensitive information adheres to the highest ethical standards. The group will collaborate with relevant institutions and authorities to develop and implement these guidelines effectively.

# AIMS & GOALS

04

## Education and Awareness:

The group aims to raise awareness and educate professionals, academics, and students about ethical issues in the prenatal sciences. By organizing workshops, seminars, and webinars, the working group will provide opportunities for learning, discussion, and reflection on ethical dilemmas and best practices. It seeks to equip individuals with the knowledge and skills necessary to navigate ethical challenges they may encounter in their professional roles.

05

## Resource Development:

The working group aims to create and curate resources that support ethical decision-making and practice within the prenatal sciences. These resources may include case studies, ethical frameworks, guidelines, and reference materials. By making these resources accessible and widely available, the group seeks to empower professionals, academics, and students to make informed ethical choices in their work.

06

## Membership and Collaboration:

The working group welcomes professionals and academia with a specific interest in ethics within the prenatal sciences. It also encourages individuals or organizations with expertise in ethical frameworks, guidelines, or ethical review processes to join and contribute. Collaborative efforts among members will be fostered to achieve the group's aims and goals effectively.

# IN SHORT

In our ethics group, we stand tall and strong,

Trust binds us together, all along.

Reliability is our ethical creed,

When we commit, we fulfill the need.

Collaboration is our ethical dance,

Transcultural, transdisciplinary, we advance.

Openness guides our ethical quest,

Honesty and integrity, we manifest.

With compassion, we handle ethical plight,

Caring for each other, shining the light.

---

By pursuing these aims and goals, the working group on ethics within the prenatal sciences aims to promote ethical awareness, integrity, and responsible practices throughout the field.
